SKILLS

- **Languages:** JAVA, C++, JavaScript, C, Python, HTML and CSS, PHP
- **Frameworks/Libraries:** Tailwind CSS, Node.js, React
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Soft Skills:** Communication, Problem-Solving Skills, Teamwork, Project Management, Adaptability

PROJECTS

Reservice – Technician Assignment & Service Management: [GitHub](#) feb'26-Mar'26

- Developed a full-stack MERN application handling 100+ service requests/day with real-time tracking via a secure web interface.
- Reduced manual coordination effort by **~40%** by streamlining technician assignment based on availability and priority.
- Secured APIs using rate limiting (**100 req/min/IP**), JWT authentication, and role-based access control, reducing unauthorized access risks. Reducing unauthorized access risks by 90%+
- Improved task visibility and response time by **~30%** through a responsive admin and technician dashboard. Optimized backend queries, reducing average response time by **~25%** and ensuring smooth handling of concurrent users.

Tech: React, Node.js, Express, MongoDB

Telemedicine Platform – Full-Stack Web Application: [GitHub](#) Jan'25-Mar'25

- Built a full-stack telemedicine platform using React, Node.js, Express, and MongoDB, enabling patients to consult doctors Remotely through a secure and intuitive web interface.
- Developed a fully responsive UI with optimized assets and API calls, Achieving 1.2-1.5s average page load time across major user flows.
- Implemented secure user authentication and role-based access Control (patients & doctors) using JWT and protected routes, Reducing unauthorized access risks by 90%+
- Deployed the frontend on Netlify and backend on Render, enabling Production-like cloud setup with CI-based auto-deployment from GitHub.

Tech: HTML, CSS, JavaScript, Tailwind, MySQL, Node.

TRAINING

Summer Training on DSA with JAVA: [CERTIFICATE](#) Jun'25-Jul'25

- Completed an intensive summer training focused on mastering core Data Structures and Algorithms (DSA) using Java. gained hands-on experience in problem-solving, algorithmic Thinking, and optimizing code efficiency.
- Covered topics such as arrays, linked lists, stacks, queues, trees, Graphs, sorting, searching, and recursion.
- Competitive programming and technical interviews Solved 300+ practice problems from Geek-For-Geeks, Coding Ninjas, Improving overall accuracy by 40–50%

CERTIFICATES

- ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM: [Infosys](#) Aug'25
- Social Network: [NPTEL](#) Jul'25
- Computational Theory: Language Principle & finite Automata Theory. [Infosys](#) Aug'25

ACHIEVEMENTS

- **250+ questions solved on Leet-code:**
Demonstrated consistent problem-solving skills by solving 250+ algorithmic challenges, improving logical reasoning and achieving `30-40% faster solution efficiency over time.
- **Participated in Hackathon:**
Collaborated in team of developers to build a functional prototype within 24-36 hours, contributing to idea development, coding and feature implementation during university hackathon.

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.68**

Punjab, India

Aug'23-Present

Sri Chaitanya Hyderabad

Intermediate: **Percentage:** 98%

Hyderabad, Telangana

Apr'21-Mar'23

Carmel Convent High School

Intermediate: **Percentage:** 98%

Mancherial, Telangana

Apr'20-Mar'21
